

OLBRICH

The standards we set ourselves for our work are high - because we are among the best in our industry worldwide. We owe this above all to our highly qualified employees and engineers, who realize innovative plants for the production of wallpaper, floor coverings, films/foils or technical textiles daily.

In the course of a succession casting for our „Electrical Engineering“ department at the Bocholt location as soon as possible, we are looking for an

ELECTRONICS TECHNICIAN FOR INDUSTRIAL ENGINEERING / WORK PREPARATION (m/f/d)

Your tasks

- Structural design of electrical low-voltage switchgears
- Work preparation for our Perforex CNC machining center as well as for the Secarex cutting center
- Planning of the electrical machine and plant installation
- Determination of material requirements for plant installations and preparation of parts lists
- Interface arrangements on a national and international level

Your profile

- Completed training as an Electronics Technician for Industrial Engineering or a comparable degree
- Several years of professional experience in the field of automation technology, mechanical and plant engineering
- Knowledge in the field of measurement, control and automatic control technology
- Knowledge of working with CAD/CAE, ERP, PLM systems
- Practical experience with motorised, pneumatic and hydraulic actuators
- Willingness to travel
- English language skills
- Independent structured way of working
- Ability to work in a team

You can expect a varied field of activity with a wide range of possibilities for creativity and development. We look forward to receiving your detailed application (.pdf document), stating your salary expectations and the earliest possible starting date.
