OLBRICH

OLBRICH GmbH is nationally and internationally active as machine and plant engineering company with more than 900 employees. We are a system provider for machines and lines for the production of web-shaped products such as wallpaper, floor coverings, films/foils and technical textiles.

For the reinforcement of our team we are, as from now, looking for

SOFTWARE DEVELOPERS (M/F/D)
PLC/HMI/DRIVE

Your Tasks

- Autonomous creation of the machine and line software
- Creation of standard modules
- Implementation of easy operating structures
- Assistance with the preparation of operating instructions
- Performance of various tests and checks
- Worldwide commissioning of machines and lines
- Order processing on schedule
- Interface coordination on national and international level

Your Profile

- Certified electrical engineering technician, electrical engineering master or equivalent qualification
- Some years of professional experience in the field of machinery and plant engineering
- Knowledge of PLC and HMI programming (S7, TIA-Portal or comparable)
- Experience in high-level languages (ST(SCL), C++ or comparable)
- Knowledge of drive technology (current converters, frequency converters, servo technology)
- Practical experience with pneumatic and hydraulic actuators
- Good English skills
- Willingness to travel

You can expect a diversified and interesting range of tasks. We look forward to receiving your informative application documents stating your salary expectations and the earliest date you could start. We ask you to please send your application in pdf-format and to combine all documents in a single file.
